

Runescape Spreading!

Thank you!

Thanks for buying the eBook! In this eBook you will learn my private spreading method that will bring in 100+ an hour and requires hardly any work!

Do not redistribute in any way

What the method is!

This method is basically hosting a runescape private server and tricking people in to using your drive-by.

It works very well because runescape uses java “I trust content from this publisher” is normal to see for rs private servers.

Another way this is useful is the drive by java code is marked as a Trojan to most anti virus’s but so are some runescape private servers which makes your site completely normal

Lets get started!

IMPORTANT Make sure port 43594 is forwarded!

First go to

<http://www.moparscape.org/smf/index.php?action=register>

And create an account (with valid email)

Now download a runescape server, I prefer DeltaClean because it’s easy to setup and doesn’t kill bandwidth as fast (you will need to keep the server running unfortunately)

<http://www.megaupload.com/?d=67LGEQL7>

Extract it to whatever I prefer somewhere on my desktop so I don’t have to look for it. Inside there will be 2 folders and 2 batch files ignore the folders and the one

Runescape Spreading!

batch file that's named compile.bat

Now run Run.bat!

A screenshot of a Windows command prompt window. The title bar reads 'Administrator: Running Delta'. The window contains the following text:

```
Starting DeltaClean...  
Initiated connection acceptor successfully...  
Starting server on port: 43594.
```

It should look something like this, now minimise Run.bat and go to <http://www.moparscape.org/serverstatus.php>

Runescape Spreading!

You should see something like this

The screenshot shows the Mopar Servers website interface. At the top left, there is a 'Visit Forums' button with a blue 'M' logo. Below this is a navigation menu with buttons for 'Online Servers', 'Offline Servers', 'Most Popular', 'Register Server', and 'Edit my Server'. The 'Register Server' button is highlighted with a red double-bordered box. To the right of the navigation menu, the text 'Mopar Servers' is displayed in large blue letters. Below the navigation menu, there is a yellow banner with the 'M' logo and the word 'Sponsored'. Below the banner is a table listing servers with columns for 'Server Name', 'Client Version', and 'Owner'. The table contains four rows of server information.

Server Name	Client Version	Owner
WEBSTERSCAPE 24/7	317	Websterscape
PROJECT 69	317	ashitri
AlternatePvP Webclient Highscores 24/7 Fun	317	bobetoe3
Green Blade Servers	317	Sultan1

Click on the Register Server box at the top right it will ask you for your account info from the account you made earlier.

Runescape Spreading!

Now you should have a page that looks like this

Register Server

Rules

- The server must be **online** to add it to the status list.
- Selling admin or mod spots on your server is **against the rules** and will result in a ban, here, and on the forums.

Name: LOOKING 4 STAFF

IP: Your no-ip ip here

Port: 43594 (<leave this)

Version: 317

Info

Rich text editor toolbar: Bold, Italic, Underline, Strikethrough, Text Color, Background Color, Bulleted List, Numbered List, Indent, Outdent, Link, Unlink, Table, Superscript, Subscript, Signature, Hash, Message, List, Change Color.

Emoticon row: Smiley, Happy, Green, Sad, Angry, Shock, Laugh, Crying, Love, Hate, ???, Green, Green.

anything you want here

Make the server name something catchy like in the picture above, you could use your real ip but it isn't wise, I would recommend using no-ip if you don't know how to use no-ip look here

<http://www.youtube.com/watch?v=-JLbSrdiJok>

Leave the port and version. For description enter this code (Change YOUR DRIVE BY URL HERE To the url of your drive by (if you don't have one read further)

```
[URL=YOUR DRIVE BY URL  
HERE!] [IMG]http://img132.im  
ageshack.us/img132/3772/png  
qce.png[/IMG] [/URL]
```

Runescape Spreading!

Now hit Register server, Note your server won't show up on the list for 30 mins so be patient but when it does it will look like this

Since noobs want power they will click ``Click On Me`` for a chance to become staff but really you are infecting them with your drive-by

Setting up drive-by!
